## Application Developer

[Apply Now](#)

Company: Litens Automotive Group

Location: Romania

Category: computer-and-mathematical

### Who is Litens?

We are a diverse group of talented people committed to creating solutions to problems and making the world a better place. We enhance and deliver both mechanical and electrified solutions that bring efficiency and sustainability to new heights. Founded in 1979, Litens has a proud history of being an innovative and highly respected company specializing in powertrain system engineering and component supply. Our history includes numerous achievements, many of which have been recognized through prestigious awards from our customers.

Experience a fulfilling and supportive environment where ingenuity is rewarded, collaboration is encouraged, and opportunities are readily available.

### Why Join Litens?

Join the Litens Business Systems team as an Application Developer. This role will appeal to professionals who seek an opportunity to enable enterprise systems and processes for an evolving global D365 platform. Having practical development experience, you will be responsible for enabling transformational improvements with D365 SCM (Supply Chain Management) extensibility. You possess exceptional analytical and project management skills complemented by a collaborative style that embraces teamwork, the sharing of ideas, and the engagement of a workforce to deliver creative solutions to meet business challenges. You measure your success by the success of the local and global team, company you work with and business partners you serve.

At Litens, you can make an impact. We have purposefully cultivated a supportive and flexible

environment that gives everyone the opportunity to succeed. Litens offers a competitive and people-first approach to compensation and benefits, and we are committed to provide balanced employment and advancement opportunities for everyone.

Our diversity is our source of strength. At Litens, we are committed to equal employment opportunity, and we value and welcome diversity. We respect employees' rights for a safe and respectful workplace. Accommodations for disabilities in relation to the job selection process are available upon request.

### **What you will do?**

Reporting to the DevOps Manager, the Application Developer will be responsible for enabling transformational improvements with Dynamics 365 platform extensibility.

Develop and maintain extensions to the Microsoft Dynamics 365 platform. (Finance, SCM, CE (Customer Engagement))

Create detailed design documentation, including UML and flow diagrams, to increase application traceability and maintainability.

Explore novel solutions with proof-of-concepts and brainstorming sessions.

Support and enhance existing applications to minimize outage time and increase effectiveness of business.

Effectively communicate ideas and features through presentations to the team and stakeholders.

Collaborate with other Application Developers, Solution Architects, Business Analysts, and Project Managers to define software requirements, and to assess feasibility of solutions within time constraints.

Contribute to code, database design, and system architecture reviews ensuring the best practices are followed.

Ensure quality of code via functional and unit testing.

Work with the project team to review problems, define and test solutions.

### **What will you bring?**

Computer Science / Engineering degree

Development experience with the Microsoft Dynamics 365 platform including Dynamics 365 Finance and Operations, Microsoft Dynamics 365 CE (CRM, XRM), and the Power Platform.

Familiarity with Microsoft Azure cloud infrastructure including but not limited to Azure Logic Apps, Azure Functions, Azure SQL, and Azure Data Lake.

Familiarity with application life cycle management

Solid understanding of relational database concepts and experience writing SQL (MSSQL & Oracle SQL) stored procedure and views.

Web development skills including HTML, CSS, Node and JavaScript are a bonus.
