**Backend Software Engineer - CloudVision working remotely - Dublin team**

**Apply Now**

Company: Arista Networks

Location: Romania

Category: computer-and-mathematical

Job Description

CloudVision is Arista's enterprise network management and streaming telemetry SaaS offering, serving the world's largest Financials, Media and Entertainment, Health Care, and Cloud companies. As we continue to scale the service and expand into new markets, we're looking to grow the team with Software Engineers in our Dublin office.

CloudVision's core infrastructure is a scale-out distributed system providing real-time and historical access to the full network state, along with frameworks for building advanced analytics. It's written in Go and leverages open source technologies like Hbase, ClickHouse, ElasticSearch, Kafka, Kubernetes, Ambassador and Zookeeper under the covers. We're constantly investing in scaling out the platform and building out richer analytics capabilities in the infrastructure.

On top of this core platform we're building device management and network analytics applications to fully automate today's enterprise network, from CI/CD pipelines for network automation, to advanced analytics and remediation for network assurance.

As a backend software engineer at Arista, you own your project end to end. You and your project team will work with product management and customers to define the requirements and design the architecture. You'll build the backend, write automated tests, and get it deployed into production via our CD pipeline.

Qualifications

BS/MS/PhD in Computer Science or a relevant experience.

Knowledge of one or more of Go, C, C++, Java or similar language.

Experience with network monitoring, network protocols, distributed systems, machine learning or data analytics is a plus.

Additional Information

Candidates must be resident in Turkey, Romania or Hungary and can work remotely.  This is a B2B rolling 12 month contract.
All your information will be kept confidential according to EEO guidelines.
