

DevOps Engineer Romania

[Apply Now](#)

Company: Chronos Consulting

Location: Romania

Category: computer-and-mathematical

Job Description

Our client is a global provider of intelligent mobile Internet solutions that enable operators to improve quality, reduce network operational expenses and manage and monetize the mobile Internet.

Job description:

The DevOps Engineer will be researching, developing, and improving system installation, configuration, monitoring, and troubleshooting tools for a large-scale telco-grade solution

Coding in a variety of languages/tools (bash, python, perl, ansible), Coding means testing your code as well

Migrating and maintaining the company portfolio for NFV architecture (based on OpenStack and VMware) and CNF architecture (based on Kubernetes)

Writing technical documents and installation guides which then will be used by the different QA/field/support engineers

Performing periodic lab maintenance and upgrade tasks (HPE, Dell, IBM, Cisco and F5 hardware)

Requirements:

Advanced knowledge of Linux internals (such as networking, file system, security, performance tuning, troubleshooting), we mainly use RHEL – Must

Proven coding capabilities in Bash and Python – Must

Solid understanding of networking protocols – TCP/IP, switching, routing – Must

Production experience with microservices application architectures and container orchestration solutions (Kubernetes, Docker, Podman, service-mesh, Kubernetes networking), CKA & CKAD certifications or equivalent experience – Must

Experience with configuration management tools such as Ansible – Must
