

Engineering Data Management Specialist

[Apply Now](#)

Company: airbus

Location: Bucharest

Category: computer-and-mathematical

Job Description:

Engineering Data Management Specialist

Airbus Defence and Space is one of the three Divisions of the Airbus Group and Europe's Number 1 defence and space company. It is the world's second largest space company and one of the top 10 defence companies globally. Airbus Defence and Space develops and engineers cutting-edge and peerlessly reliable products in the field of defence and space. Its defence and space technologies enable governments and institutions to protect natural resources, societies and individual freedom.

Interest group:

IT technical specialists; Project Management background is a plus

Contract type/working time:

Permanent/Fulltime

Work experience:

min 2 years overall working experience in IT / System Engineering technical domain

min 1 year experience in Project Management support area

We are looking for **Chief Engineering Office / Engineering Data Management Specialist** to become part of the Airbus Defence and Space Romania team.

Mission: Special subtype of system engineering with the focus on a transversal Engineering speciality: Chief Engineering Office / Engineering Data Management. Collaborates closely

with the Chief Engineer / engineering project manager of different systems/system elements for Airbus Defence and Space applying the most efficient and innovative technologies, process and tools related to this specific area.

Areas of impact: Project management, software development lifecycles, scheduling, engineering KPI reporting, interactive dashboards, delivery management, requirements' database administration, technical documentation processes

Responsibilities:

Provides high level expertise on the Specialty area, in an interdisciplinary approach governing the total technical and managerial effort to support a solution throughout its life cycle

Participates in the definition, set up, institutionalization, supporting and maintenance of the Engineering Data Management / Chief Engineering back-office tools, standards, process and deliverables

Defines / manages the specific deliverables for the Specialty area, in accordance to the project life cycle or engineering organization's needs.

Builds and integrates the Engineering Data Management / Chief Engineering back-office processes towards the establishment of a complete solution, as delivered by the project

Participates into definition of supporting life cycle processes that balance cost, schedule, and performance objectives

Prepare and deliver Engineering Data Management / Chief Engineering back-office artefacts (e.g. interactive schedules, resource plans, interactive dashboards, chief engineering / project management reports, SW/HW deliverables, Confluence pages, technical documentation, Earned Value Management KPIs) in collaboration with responsible Work Package Managers

Based on business needs, occasional travel within and outside the country may be required.

Requirements:

Experience in IT / System Engineering technical domain with IT technical background (e.g. Software, Computer Science)

Experience with Agile Project Management (Confluence, Jira, Big Picture, Easy BI), project management tools (Ms Project, Enterprise Project Management, Ms Excel, SAP, Action items tracking, SharePoint, Risk management) and project management processes – at least one project management tool and experience in Agile tools are a must (e.g. Jira / Big Picture / Easy BI, Ms Project or similar others)

Experience with data analysis, integration and reporting from various systems

Ability to easily communicate and interact with stakeholders (Chief Engineers, Project Managers, Work Package Managers etc.) – the role is transversal and assumes communication with various managers and teams, most communication needs to be handled remotely

Fluent in English, ideally basic German and French

Specific knowledge

Ability to understand and use basic scripts related to the tools mentioned above (Jira - JQL, Confluence Macros and creation of export templates, Excel / MS Project – VBA, etc), also administration and configuration of various tools - with guidance

Knowledge on Software development processes and/or hardware, engineering, Agile way of working, Jira / Confluence

Knowledge on the Specialty area: Project Management and basic financial processes

Nice to have:

System engineering tools knowledge (e.g. DOORS, EA, Cameo, HP Quality Center)

Familiar with System Engineering methodologies (e.g. INCOSE)

Competencies:

Strong customer orientation

Excellent interpersonal skills – ability to quickly communicate the proper information

Result oriented and organized

Problem solving

Flexibility and adaptation to change

Dealing with ambiguity

Working in a multicultural environment / as part of a team

What do we offer you?

A great place to develop your career

Exciting and meaningful projects

Continuous education and training

A motivating salary and a comprehensive package of benefits

Performance related bonus

This job requires an awareness of any potential compliance risks and a commitment to act with integrity, as the foundation for the Company's success, reputation and sustainable growth.

Company:

Airbus Defence and Space Romania SRL

Employment Type:

Permanent

Experience Level:

Entry Level

Job Family:

Sub-system development <JF-EN-EQ>
