

Senior Backend Developer

[Apply Now](#)

Company: Sigma Software

Location: Romania

Category: computer-and-mathematical

Overview

Required skills

Node.js / strong React / good English / strong

We're seeking a dynamic Senior Backend Developer to join our team.

Our passion for quality code and user experience drives our work. We value a blend of high standards, thoughtful development, and practical problem-solving. Our environment is fast-paced and perfect for engineers keen on diverse projects, exploring new tech, and collaborating across teams.

If this resonates with you, let's connect!

Customer

Our client, a prominent broadband communications and video services provider in the United States, stands at the forefront of innovation in the telecommunications industry.

Committed to delivering high-quality services, they focus on meeting the diverse needs of their customers across the nation.

In their pursuit of excellence, our client aims to reduce dependencies on external platforms, ensuring a more robust and self-reliant operational framework. By emphasizing the development of an independent infrastructure, they intend to fortify their ability to deliver uninterrupted, high-speed communication and video services. This strategic approach aligns with their commitment to providing reliable and cutting-edge solutions, fostering greater customer satisfaction and setting new standards of service quality within the industry.

Requirements

Requirements

Demonstrated background as a Senior Software Engineer or a similar role

Profound proficiency in Node.js

Proficiency in creating documentation

Familiarity with AWS, Terraform, and Serverless

Capability to operate autonomously

At least an Upper-Intermediate English level

Would be a plus

Mastery in several programming languages (React, Java, PHP, Go, Ruby, JavaScript, etc.)

Personal Profile

Effective communication capabilities

Proficiency in simplifying technical concepts for comprehension

Robust aptitude for problem-solving

Responsibilities

Responsibilities

Review code repositories across diverse programming languages

Decipher undocumented codebases for identifying enhancements and dependencies

Implement enhancements in infrastructure

Engage with product teams to acquire insights into systems

Generate extensive documentation (e.g., readme files, architecture diagrams, SLAs)

Engage in knowledge exchange sessions
