

Senior Mobile Engineer Kotlin

Apply Now

Company: DNA Technology

Location: Timișoara

Category: architecture-and-engineering

You have a chance to **provide stability** and **reliability** of the cashback system which generates **significant revenue for the company**.

The main technologies are: **Kotlin (Android)**

Products also use: Swift(iOS) and TypeScript(Ionic), CD: Fastlane

We work remotely and from the office - it's up to you where you feel comfortable :)

At DNA you will experience:

Transparent communication(open and regular feedback, regular discussions about the business position of the company)

Strong focus on **psychophysical comfort**(medical and group insurance, multisport card, regular mood conversations)

Concentration on **personal development**(mentoring process, knowledge sharing sessions, 4 hours a week dedicated to self-development, individual English lessons, 1:1 development sessions)

Strong focus on **building relations**(DNA team lunches; we cover costs of transport and hotel for people living outside Lodz; dedicated space for not job-related chats)

Flat structure (no hierarchy) where everyone is involved in making the company's decisions

What can you expect?

autonomous team

technical challenges (heavy load)

impact on product revenue

defined tech debt to take care of

support from other team members

opportunity to learn frontend, backend, and mobile technologies

What will you do?

maintain products and make sure they work reliably and smoothly (80%)

develop new features (if needed)

Crucial experience:

Kotlin (Android)

communication in English with foreign clients

at least 5 years of commercial experience

What will be additional value?

Swift (iOS)

TypeScript (Ionic)

If you want to work on multiple technologies to solve problems and feel that you and DNA could be a good match, feel invited to take part in the recruitment journey!
