Company: DOW JONES

Location: Romania

Category: computer-and-mathematical

Description

About Us

OPIS, a Dow Jones company, provides price transparency across the global fuel supply chain, including the Spot, Wholesale Rack and Retail markets. OPIS enables customers to buy and sell energy commodities with confidence via multi-platform access to accurate data, real-time news, powerful software and educational events. Our commitment to reliability is reinforced by personalized customer service and constant innovation. OPIS listens to what energy stakeholders need and responds with flexible and easy-to-use products. Navigating world fuel markets is complex – OPIS makes it simpler.

Your Role

Currently Dow Jones is looking to expand its Romanian .NET software development team based in Bucharest. The job is open to remote and hybrid models. This is a unique opportunity to join a fast-growing team that will become an important part of global Dow Jones IT. This team will work closely with the Dow Jones IT HQ based in Gaithersburg, US. To fit this role, we are looking for that unique mix of solid technical capabilities, blended with strong interpersonal skills.

Responsibilities

Report to our Director of Software Engineering

Write, build and deploy code

Analyze business application requirements, identify concerns and develop action plans

Be part of an Agile team, using company's latest software development life-cycle working closely with team members from Romania and US

Leverage our Cloud infrastructure (AWS) in order to design solutions that make the best of

Maintain existing legacy applications

Track down and resolve bugs in any Dow Jones code base

Adhere to best practice development standards (such as continuous integration and deployment)

You have:

Bachelor's Degree in computer science or related technical field

2-4 years hands-on software development experience

Strong knowledge of JavaScript/TypeScript, CSS, Webpack, and front-end frameworks (React/Vue/Angular/Aurelia/etc.)

Strong knowledge of C# and Microsoft .Net framework

Strong knowledge of OOP, SOLID principles, IoC/DI and design patterns.

Good understanding of a relational database engine - SQL Server (or PostgreSQL)

Experience with modern software development life-cycle

Must speak and write in English fluently
