

Software Engineer - Frontend or Fullstack

[Apply Now](#)

Company: Oracle

Location: Romania

Category: computer-and-mathematical

The Oracle Health & AI (OHAI) team can provide you the opportunity to build and operate a suite of massive scale, integrated cloud services in a broadly distributed, multi-tenant cloud environment. OHAI is committed to providing the best in cloud products that meet the needs of our customers who are tackling some of the world's biggest challenges.

Oracle Health & AI is a new organization trailblazing a transformative path in healthcare through the power of AI. OHAI aims to transform the health care industry, providing modernized, automated, patient-centric healthcare and make the best clinical tools available around the world.

The Oracle Digital Assistant (ODA) team, the conversational AI arm of Oracle Health & AI, is building the world's largest SaaS Digital Assistant platform to enable customers to build conversational AI experiences for every conceivable need. Everything from banking services to interactive digital storefronts to patient tracking tools and medical assistants for doctors. Leveraging the advancements in Generative AI technologies, we seek to re-imagine healthcare applications and experience for both patients and clinicians. Our team is at the forefront of revolutionizing healthcare through advanced conversational AI and clinical automation solutions.

Required Skills/Qualifications

/ . in Computer Science, Computer Engineering, Software Engineering, or related areas.

1+ years of relevant professional experience in software development.

1+ years experience in plain JavaScript / JQuery /

Good knowledge of HTML5 / CSS.

Good knowledge of one or more JS frameworks like React / Angular / Vue

Solid engineering and coding skills.

Solid understanding of basic data structures, algorithms, async and object-oriented programming.

Aptitude to be a good team player and the willingness to learn and implement new technologies as needed.

Very good written and spoken English.

Preferred Skills/Qualifications

Full stack skills with good knowledge of Java programming language.

Good understanding of asynchronous request handling, multithreading, multiprocessing, microservices and distributed systems fundamentals.

Proven track record of successfully delivering on enterprise-level cloud applications on cloud environments like Amazon Web Services, Microsoft Azure, Google Cloud, Oracle Cloud (OCI).

Exposure to orchestration and configuration management tools like Terraform, Kubernetes, Docker.

Exposure to Grafana, Prometheus or other TSDB.

Experience with at least one of the following (automation): Jenkins, Hudson, Maven, Artifactory etc.

Basic understanding of machine learning and artificial intelligence concepts.

Working with or supporting production, test, and development environments for medium to large user environments.

Experience in a 24x7 high-availability production environment.

Special Requirements: Successful candidates might be required to perform on-call duty on rotational basis.

Oracle is an Equal Employment Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, sexual orientation, gender identity, disability and protected veterans status or any other characteristic protected by law.
