Software Verification Engineer Are you a skilled Software Verification Engineer looking for a challenging and rewarding opportunity? Codekeeper is on the hunt for a technical wizard with a flair for problem-solving and a passion for quality software. Join us in a dynamic role that demands creativity, teamwork, and a dedication to excellence. We're accepting applications for the next two months and will fill the position as soon as we find the perfect match. Role Description: The primary focus of this role is to ensure the integrity and reliability of our customers' software through verification processes. This role involves analyzing technical documentation, executing successful software builds in various programming languages, and validating software functionality against specified requirements. Additionally, the role encompasses a variety of tasks in backend, frontend, and DevOps, making versatility and adaptability key traits for the successful candidate. Key Responsibilities: Software Verification: Conduct verification of customer software using provided technical documentation. Achieve software builds across various programming languages. Identify, diagnose, and resolve build issues, ensuring software meets quality standards. Technical Analysis and Problem Solving: Analyze software requirements and technical documentation to understand build processes and dependencies. Collaboration and Communication: Communicate effectively with team members and clients to understand requirements and provide updates. Continuous Learning and Improvement: Stay updated with emerging technologies and programming languages relevant to software verification. Contribute to the continuous improvement of verification processes and practices. Additional Backend, Frontend, and DevOps Tasks: Assist in backend and frontend

development tasks as required. Participate in DevOps activities, including CI/CD pipeline development and maintenance. More about Codekeeper: Codekeeper was founded by tech industry professionals to revolutionize software escrow for the cloud era. We offer state-of-the-art software escrow solutions that mitigate third-party risks in business operations. As a remote-first company with a central office in The Hague, we prioritize a healthy, resilient organization to support the development of our robust app. For more information, visit our website: https://codekeeper.co/ What We Offer: Passionate and fun-loving colleagues Startup mindset with ample opportunities for growth Regular team activities and gatherings Comprehensive onboarding process with a dedicated ramp-up period A supportive team that values open communication and direct feedback A chance to excel in your career and make a difference What we are looking for: 3+ years development / devops experience 2+ years of experience with Linux, Windows and Mac environment fundamentals Basic understanding of popular backend languages (Python, Java, NodeJS and PHP) Prior experience or understanding of database- and server configuration (MongoDB, SQL, MySQL) Prior experience or understanding of Git Basic knowledge of front-end languages HTML, CSS, and JavaScript beneficial Basic knowledge of AWS technologies beneficial Basic knowledge of API configuration beneficial Experience with various build tools, like (but not specifically) msbuild, webpack, maven, and others of the type beneficial. Additional Requirements: Technical Expertise: Proficiency in multiple programming languages and software development tools. Analytical Skills: Strong ability to analyze technical documentation and identify key requirements. Problem-Solving: Excellent problem-solving abilities to diagnose and resolve complex software issues. Communication: Effective communication skills, both verbal and written, for collaborating with teams and clients. Adaptability: Ability to adapt to various programming environments and quickly learn new technologies. Teamwork: Strong team player with the ability to work in cross-functional teams. Time Management: Excellent organizational and time-management skills, with the ability to handle multiple tasks simultaneously. Additional Info: Job Location: Remote (#LI-Remote) Join us to shape the future of software escrow! Powered by JazzHR
